Places to Hike in Greater Worcester

Worcester is a great place to live. Over the years, many organizations have protected green space, for the benefit of everyone. This guide includes a brief description and map for each of the following areas.

1. Asnebumskit Hill  
Paxton, Holden

2. Blackstone River Bikeway  
Worcester, Millbury

3. Bovenzi Conservation Park  
Worcester

4. Broad Meadow Brook  
Worcester

5. Buck Hill Conservation Center  
Spencer

6. Burncoat Pond  
Spencer

7-1. Cascades & Boynton Parks  
Paxton, Holden, Worcester

7-2. Cascading Waters & Cook’s Pond  
Worcester

8. Coes Reservoir & Columbus Park  
Worcester

9. Cook’s Canyon  
Barre

10. Cookson Park  
Worcester

11. Cormier Woods  
Uxbridge, Mendon

12. Crow Hill Savannah  
Worcester

13. Donker Farm, Donker Farm North, Cook’s Brook  
Worcester

14. Eagle Lake  
Holden

15. East Side Trail, Green Hill Park & Trinity Woods  
Worcester

16. East-West Trail  
Worcester

29. Elm Park  
Worcester

17. Elmer’s Seat  
Boylston

19. Fowler Brook Gorge & Fowler Brook South Fork  
Worcester

18. Frank Cooke Forest  
Leicester

19. God’s Acre or Deed Rock & Tetasset Ridge  
Worcester

20. Hadwen Arboretum  
Worcester

21. Hadwen Park  
Worcester

25-2. Holbrook Forest  
Worcester, Holden

22. Henrickson Orchard  
Holden

23. Illig Pond Conservation Area, Paxton Recreation Commission  
Paxton

24. Kettle Brook  
Worcester

25-1. Kinney Woods & Cook’s Woods  
Worcester, Holden

26. Lake Park  
Worcester

33. Marois 28  
Worcester

27. Moore State Park  
Paxton

28. Moreland Woods  
Worcester

45. Muir Meadow  
Paxton

29. Newton Hill & Elm Park  
Worcester

30. Nick’s Woods  
Worcester

31. Oak Hill & Waterman  
Holden

32. Oxbow National Wildlife Refuge  
Devens, Harvard, Ayer, Shirley

33. Parson’s Cider Mill & Marois 28  
Worcester

34. Patch Reservoir  
Worcester
Princeton, Massachusetts has not been included in this guide. This is a large area that has many recreational areas. Two significant ones are:

### Hunting

Hunting is prohibited in Worcester, but is allowed in most of the surrounding communities. Following is a copy of the hunting schedule for 2017. During hunting season it is prudent to wear blaze orange or similarly bright clothing. If dogs are allowed, it is good to keep them on a short leash. Hunting is not allowed on Sundays.

</table>

1 – Pelt sealing required; see page 44.
2 – Bobcats may only be trapped in zones 1-8
Ticks

Ticks have become a major concern for everyone. There are two types of ticks in Massachusetts, both spread tick-borne diseases. Deer ticks may carry germs that cause Lyme disease, babesiosis or human granulocytic anaplasmosis. American dog ticks can carry germs that cause Rocky Mountain spotted fever and tularemia. Ticks are a serious problem, but don't let fear keep you from enjoying the wild places of Worcester County. Sensible and careful precautions can help you take a safe walk in the woods. Here are a few thoughts and suggestions.

As you can tell from the identification card below, the deer tick nymph is the size of a poppy seed and the adult, the size of a sesame seed. Ticks are around all year long but are only active when the temperature is above freezing. The tiny deer tick nymphs are out in Spring.

When outdoors, wear light colored long pants and long-sleeved shirts. The light colors make the ticks easier to see. Pull your socks over your pants to create a physical barrier to keep a tick off your skin.

Using bug repellent can help. Follow package instructions to treat your clothes with Pyrethrin. One treatment will last for at least several washes. You can also apply a bug repellent with Deet to your skin.

When hiking, stay in the middle of the path and avoid high grass.

After a hike, do a tick check before you go indoors. The earlier you find a tick the easier it is to remove. Putting tape on an unattached tick is an easy way to pick one up. Just fold the tape over the tick and throw the tape away. Comb your hair with a fine tooth comb to catch a tick that has not attached. Check the nape of your neck; ticks like to hide in the first inch of hair. Ticks hide very well, so check your whole body.

The best way to kill any undiscovered ticks on your clothes, is to put them in the dryer for 10 minutes on high. If you are washing the clothes first, dry them completely on high. Showering may remove an unattached tick, but it isn't a guarantee.

Remove attached ticks at once. Grasp the tick close to the skin with tweezers and pull firmly upward. Avoid squeezing the tick.

If you suspect that you have a tick-borne disease, see your doctor.
Asnebumskit Hill
Paxton, Holden

The Greater Worcester Land Trust
White Oak Land Conservation Society
Paxton Land Trust & the City of Worcester

Northern Side: Asnebumskit Ridge Trail

Location:
1) Asnebumskit Road: From the intersection of Route 122 North and Asnebumskit Road in Paxton, turn East on Asnebumskit Road. Drive .80 mile. The trailhead is on the left. Park on the side of the road near the sign.
2) South Road: From the intersection of Reservoir Street and South Road in Holden, travel .80 mile North on South Road. There is a parking lot on the left side of road.

Length: 2.18 miles each way

Asnebumskit Ridge Trail: Generous land owners have given right of way to their properties. This trail crosses both private property and our drinking water supply. In appreciation for this easement, please obey the following trail rules.

- Use permitted from sun-up to sun-down only
- No littering
- No fires or smoking
- No dogs, horses, or other animals
- No alcoholic beverages
- No motorized vehicles
- No firearms, bows, or other projectiles. No loud noises
- No destruction or defacement of plants or other property

If you start at Asnebumskit Road, the majority of this one way hike is downhill. The first portion of the trail takes you through a woodland. Along the trail are ferns and moss-covered logs, as well as wet areas and streams to cross. You emerge from the woods into a formerly logged area. The balance of the hike follows old logging roads. There are fields of ferns, wildflowers, and shrubs among the remaining trees. You will enjoy views of Mount Wachusett. To complete the hike, retrace your steps uphill to the trailhead.

Southern Side: Asnebumskit Ridge & Thoreau’s Seat

Location:
1) Western end of Nipmuck Road. Park on the side of the road at the trailhead.
2) Anticipated new parking lot, on Pleasant Street just South of Pleasant View Nursery and .15 mile West of Indian Hill Road. The trailhead is beyond the gate on the right.
3) Eastern end of Asnebumskit Road, Asnebumskit Hill summit. near cart path.

Dogs on leashes are allowed.

Southern side of Asnebumskit Hill: There is a cart path that extends from Pleasant Avenue to Asnebumskit Road at the summit. There are side paths and new logging roads that are being converted into paths. Near the summit is a scenic overlook, Thoreau’s Seat, that offers a wonderful view of the valley to the West including Kettle Brook Reservoir Number Four.
Generous Property owners have granted right-of-way. Please stay on the trail.
Blackstone River Bikeway  
Worcester/Millbury  
US National Park Service

Location: The parking area is located on Millbury Street, near the intersection of Cliff Street. This is 1.30 miles South of the intersection of Providence and Millbury Streets (the “red” bridge).

Length: 3 miles, 1.50 miles South and 1.50 miles North

Dogs on leashes are allowed.

This is a completed portion of a bikeway that will run the length of the Blackstone River Corridor, from Worcester, MA to Providence, RI.

This bikeway is popular with bikers, runners, and walkers of all ages. The Blackstone River is visible for most of the way.

From this parking area you can walk South for 1.50 miles to Millbury. There is also a parking area off of Route 122A, East of The Shoppes at Blackstone Valley. The path takes you along the highway, under overpasses and by ponds. Native shrubs and flowers have been planted along the paved path.

Heading North, this dedicated bikeway has now been completed to McKeon Road where the road crosses Route 146 (the “red” bridge). Across the street is the future site of the Blackstone Heritage Corridor Visitor Center. This center is to be a hub for recreational, cultural, and historic areas in Central Massachusetts. Adjacent to this Visitor Center, Blackstone Gateway Park is also under construction. It will have half a mile of paths and showcase works of art. Both of these facilities are slated to be open in the Fall of 2017.

Among the highlights can be found along the path are Great Blue Herons, Green Herons, Belted Kingfishers and many ducks. Painted Turtles can be found on rocks and logs in the wetland areas.
Blackstone River Bikeway
Worcester to Millbury Section

Future home of:
Blackstone Heritage Corridor Visitor Center

Future home of:
Blackstone Gateway Park

Parking
Open Greenway Section
Bovenzi Conservation Park
Worcester
Greater Worcester Land Trust

Location: 1) Maravista Road. Off West Mountain Road. Follow Maravista Road to the end. Park near the gate.
2) Sunrise Ave. From Ararat Street, follow Sunrise Avenue North to the end. Park in front of the sign.
3) Marchen Drive. From Brattle Street, park on the right side of Marchen Drive alongside the woods near Brattle Street.

Length: Several miles

Dogs on leashes are allowed.

This is a lovely wooded area with streams running through it. It was decimated by the Asian Longhorned Beetles and the resulting tree removal in 2009. Most of the original trails were obliterated by tractors, but remnants of some trails still remain, along with “logging” roads and newly blazed paths.

The following map shows the current paths. The North-South path goes from Maravista Road across the property to Sunrise Avenue. Another new trail, the East-West path, starts from Marchen Drive and meets the North-South path near Maravista. The Greater Worcester Land Trust has built a tent platform near the East-West path. Camping is offered by permission. For information please check the GWLT website; [Camping on GWLT Lands](#).

The recovery that has taken place is amazing. Young trees have gotten the chance to grow and older trees are filling out. In the Spring there are at least five vernal pools that are fun to explore. Bovenzi has a wide variety of wildflowers and has attracted many birds, butterflies, chipmunks, and deer. It was also recently visited by a moose. Among the highlights in Fall are the numerous Witch Hazel trees in flower.
Broad Meadow Brook Wildlife Sanctuary  
Worcester  
Mass Audubon Society

Location:  414 Massasoit Road  
Worcester, MA  
(508) 753-6087

Length:  5 Miles of hiking trails, 1 mile is universally accessible.

No dogs allowed.

This full service Audubon Center has an environmental resource center, meeting spaces, a gift shop, and rest rooms, as well as a newly completed education center. The Fargo Education Center has been designed to be highly energy-efficient.

The sanctuary offers many diverse programs and activities for all ages, all year long. In the winter, snowshoes can be rented by the hour for a small fee.

Broad Meadow Brook offers hiking trails that are moderately easy, taking you through a wide range of habitats including fields, wetlands, across brooks, and into oak forests. There is an excellent opportunity to see butterflies and dragonflies in the butterfly garden in front of the Nature Center, on Wilson Way and along the Power Line Trail.

Troiano Brookside Trail is a universally accessible trail that runs along Broad Meadow Brook and wetland. Ducks, many other bird species, turtles, and muskrats frequent the brook.

The Sanctuary has a half-mile Sensory Trail. It is a universal access trail, which features fourteen stops that explain the natural history of the area as well as the sights and sounds that can be found. Signs have the stop number and name in braille and the walk has a companion audio presentation that is available in multiple options. The Frog Pond on the Frog Pond Trail is one of the stops that is fun to check out.
An Easy Way to try Snowshoeing

Find a friend and go to:

Massachusetts Audubon Sanctuary
Broad Meadow Brook
414 Massasoit Road
Worcester, MA
(508) 753-6087

Snowshoes can be rented by the hour from the Nature Center:

- Audubon Members: $2/hour *
- Non-Members: $4/hour

Snowshoe Rental Hours:
- Tuesday thru Saturday 9:00 am - 3:30 pm*
- Sunday 12:30 pm - 3:30 pm

There are many trails that you can try. For a fairly easy loop that takes you about 1 hour:

Take the “universal access” trail from the Nature Center down the Holdredge Trail. Follow the Holdredge Trail across the brook and turn left onto the Enchanted Forest Trail. Turn left again, onto the Sprague Trail, then left onto the Frog Pond Trail. Turn right when you meet the Holdredge Trail, and climb up the hill returning to the Nature Center.

Snowshoeing Basics:
Snowshoeing is like marching.
Try not to step on your other snowshoe or anyone else’s.

Following a packed down path is fairly easy. Walking in deep snow can be more difficult. Modern snowshoes are small, light, and easy to walk in, but they will sink in deep snow.

Turning around will take a few extra small steps.
A hiking or ski pole can make maneuvering easier.

* 2017 Information. Check with the Nature Center for current hours of operations and pricing.
Buck Hill Conservation Center
Spencer
Worcester County 4-H Center
Camp Marshall

Location: From the intersection of Routes 122 and 31 in Paxton, take Route 31 South. Drive 3.2 miles, and turn left onto Thompson Pond Road. There will be a sign for 4-H Camp Marshall. Drive for .30 mile, turn right onto McCormick Road. Drive .90 mile. (You will be passing Worcester County 4-H Camp Marshall.) The parking area for Buck Hill is a generous pull off on the right side of the road, opposite Buckhill Pond.

Length: The Pond Trail is a loop of about 1 mile. There are various options to extend your walk many more miles on snowmobile trails, the Midstate Trail, and into Spencer State Forest.

Dogs on leashes are allowed.

Buck Hill Conservation Center has 128 acres, part of the Camp Marshall 4-H Center, and is adjacent to Spencer State Forest. This wooded area has a variety of trails ranging from well used woods roads, to less travelled paths. There are snowmobile trails that connect you with areas all around Spencer, and the Midstate Trail meanders through the property on its way through the state. One trail takes you through the meadow on top of Buck Hill, while other paths follow along the banks of Turkey Hill Brook. The Buck Hill portion of the area conducted a timber harvest in the Fall of 2016 to improve the health and quality of the forest, as well as improve wildlife habitat, and recreational access. Logging has temporarily scarred the property but nature is nicely rebounding from this harvest.

The trails are lined with woodland plants like Winterberry and Partridge-berry. In the Spring you may see ephemeral flowers like Red Trillium, Marsh-marigolds, Clintonia, and Indian Cucumber-root. Buckhill Pond is stunning all times of the year, from the reflections of clouds in the water, to a rainbow colored floral display in the summer. Moose have been seen swimming across the pond.

Camp Marshall has a Horse Camp and the trails are used by the camp.
Burncoat Pond  
Spencer  
Mass Audubon Society

Location:  
1) The official entrance has been established in conjunction with Sibley Farm. The parking area is on Greenville Street 1.20 miles from the intersection of Route 9 and Greenville Street in Spencer.

2) At the Leicester/Spencer Line on Route 9 (Main Street), take Polar Spring Road (a dirt road adjacent to the golf driving range and the Spencer Country Inn) to the end. About .20 mile. Park on the left side of the road where indicated.

Length:  
There is a total of 8 miles of trails in the Burncoat Pond and Sibley Farm trail system. The following map shows several trail options. For the map of the whole trail system, see Sibley Farm.

No dogs allowed.

The parking area on Greenville Street is shared with Sibley Farm. There is a path that connects with the Flat Rock Trail and the balance of the Burncoat Pond trails. This fern lined trail takes you past many glacial boulders and makes it easy to visit Richard’s Overlook as well as the other loop trails.

The Polar Spring Road entrance takes you along the Midstate Trail through a pasture, woodlands, wetlands and a picturesque pond. From the pond you can follow the Beaver Bend Trail. This short loop trail takes you along a beaver wetland. In the Spring, check out the nesting Great Blue Herons. Shortly after the Beaver Bend Trail rejoins the Midstate Trail, the newer Burncoat loop trails split off to the South. The Midstate Trail heads off in an Easterly direction, continuing onto the Sibley Farm property.

Other highlights include the Red Trillium, followed by the Painted Trillium in Spring and in mid-June, beautiful displays of Mountain Laurel.
This map has been modified from the original Mass Audubon map to show the new parking area on Greenville St. and new trails. See Sibley Farm for the complete map.
The Cascades and Boynton Park
Worcester/Paxton/Holden
Greater Worcester Land Trust

Location: Starting from the Worcester Airport rotary on Route 122, drive .20 mile West, towards Paxton. Turn right onto the second Mower Street, drive .20 mile to a fork in the road. Take the right hand road and follow it for another .20 mile to the parking area.

Length: This park is made up of several parcels of land: Boynton Park, Cascades West, Cascades East, Cascades Park, and Cascading Waters. Cascading Waters will be addressed on the next page. There are many trails that cross these parks. Trails can be combined for a short hike or one that covers many miles.

Dogs on leashes are allowed.

These parks are on the foothills of Asnebumskit Hill, and most of the trails involve elevation change. Many of these trails are also rocky and some double as streams in wet weather. Most of the area is wooded, but there is a meadow in Cascades West that has been enlarged to expand the opportunities for wildlife habitat. Several trails follow along streams and there are vernal pools that can be explored in the Spring.

There are many highlights, starting with the Spring ephemeral flowers; Blood-root, Red Trillium, Trout-lilies, Blue Cohosh, and Marsh-marigolds. The waterfall that crosses the Silver Spring Trail and the “Indian Church” or Stone Amphitheater are also destinations not to miss.
Cascading Waters
Worcester
Greater Worcester Land Trust

Location: From the intersection of Chandler and Pleasant Streets, take Mower Street traveling Northwest. (In front of the Santander Bank.) Continue for about .15 mile and bear slightly right onto Olean Street. Continue about .45 mile. A large wooden sign for Cascading Waters will be on the left along with a small parking area.

Length: Follow the path .10 mile to the waterfall. Other trails in the Cascade Park System can be accessed from here and from Cascades East which has an entrance about .50 mile North on Olean Street.

Some highlights include spectacular views of the falls in the Spring or after a heavy rain. Spring is also the time to see an expanse of ephemeral flowers like Blood-root, Trout-lilies and Blue Cohosh, as well as Jack-in-the-pulpits.

Cook’s Pond
Smith’s Pond Corporation
The Greater Worcester Land Trust

Cook’s Pond is located across the street from Cascading Waters. You can park at Cascading Waters and walk South about .10 mile back towards Pleasant Street to access a walking trail that takes you around much of the pond, over a dam, and down the stream. You can walk 1 - 2 miles enjoying many spectacular views of the pond. Great Blue Herons, ducks and muskrats are often found here. There are White Water-lilies in the pond and wildflowers that line the pond’s banks.
Coes Reservoir/Columbus Park
Worcester
City of Worcester
The Greater Worcester Land Trust

Location:  
1) There is a parking lot and entrance at the Northwest end of Englewood Ave. 
2) There is a sign for Columbus Park located at the end of Circuit Avenue North. 
   There is room to park several cars along the side of the road. 
3) Parking is available at the Knights of Columbus parking lot. 
4) There is also a parking lot at the South end of Coes Reservoir. It is off Mill 
   Street on Coes Street.

Length: 1 - 2 miles

Dogs on leashes are allowed.

The new entrance off Englewood Avenue (1) is also accompanied by a play area, and a multi-
purpose field. There is an established path that runs along the reservoir showcasing views of 
Paper Birches against the water. This is part of the new East-West Trail. Many birds including 
Mute Swans, Ring-billed Gulls, Canada Geese and a Red-tailed Hawk, as well as muskrat 
make this area their home. The path continues over the foot bridge on the dam spillway, past 
the former Coes Knife property, and all the way to the beach on Mill Street.

The Sterns Tavern has been moved the the Coes Knife property near the Coes Street parking 
lot. An all-persons play area is being constructed.
Cook’s Canyon
Barre
Mass Audubon Society

Location: From the intersection of South Street and Route 122 in Barre Center, travel .30 mile South on South Street. The Sanctuary will be on the left.

Length: About 2 miles

No dogs allowed.

Cook’s Canyon Trail is an easy level loop trail. Taking the right hand trail (Western side), you walk along a broad dirt road that takes you past a meadow and through the woods. Galloway Brook Trail, is a short side trail, that takes you along Galloway Brook. It rejoins the main trail near the pond. To the South, the pond flows over a waterfall and continues through a scenic gorge. The footing on the rocks there can be treacherous. The stone ledge to the left of the gorge offers a beautiful view of the valley. Continuing the second half of the loop, you will be walking on a dirt path. This side is wooded and travels through some damper areas. Wooden planks are strategically placed over the wetter areas. This side runs along a stone-wall property boundary. Take care take not to inadvertently take a private trail that branches off of the main trail.

Both sides of the trail have a variety of wildflowers.
Cookson Park  
Worcester  
City of Worcester

Location: Cookson Park (or Cookson Field) is located on College Hill near Holy Cross. Take College Street up the hill and turn West onto Kendig Street. (There isn’t a street sign at this time, but there is a sign for Cookson Field.) The parking lot is at the end of Kendig Street.

Length: About 2 miles

Dogs on leashes are allowed.

Cookson Park is a 26.50-acre property located on top of College Hill. The park prominently features massive granite ledges; many of which are covered with mosses and lichens. In dramatic contrast are the towering oak trees that form a canopy over the property. In the Spring there are Pink Lady’s-slippers, Spotted Crane’s-bills and Canada-mayflowers along the paths.

A former Little League field has developed into a colorful meadow. Yarrow, Spotted Knapweed, Annual Fleabane, Red Clover, Queen Anne’s Lace, Butter-and-Eggs Toadflax and goldenrod are some of the flowers on display.

The paths frequently intersect each other as you hike up and down this property. Year round you can get a view of Worcester from a few spots; the path heading West towards the meadow and from the Northern gate on the Trolley Trail. When the leaves are off of the trees, there are additional views of the city, but without the foliage, the property is a little noisy from the traffic on I-290. Wild Turkeys, Cooper’s Hawks, Barred Owls and White-tailed Deer have been spotted here.

The City of Worcester, Friends of Cookson Park, Greater Worcester Land Trust, students from Holy Cross and others are continuing to improve and develop this property.
Cormier Woods
Uxbridge and Mendon
The Trustees of Reservations

Location: From the intersection of Routes 16 and 122 in Uxbridge, follow Route 16 East for about 1 mile. Take a slight right turn onto Henry Street and continue for .40 mile. Turn right onto Blackstone Street and continue on Blackstone for .30 mile. Turn at the second left, Chapin Street. (This road may not have a sign, but it is the street after Hollis Street.) Follow Chapin for .75 mile, the sanctuary will be on the left side of the road.

Length: 1 1/2 to 3 miles

Dogs on leashes are allowed.

This former farm has four easy loop trails that take you through a variety of habitats. There is a barn by the parking area and a farmhouse (private residence) across the street.

On the Eastern side of Chapin Road is an easy loop trail that goes through a woodland and over a small stream. There are native grass fields that have a variety of wildflowers including Black-eyed Susan, Showy Goldenrods and asters.

On the Western side, the main loop goes through a woodland area which features a field of glacial boulders, rocky ledges and outcroppings. The stream that crosses the path has Jack-in-the-pulpits along its banks, and in the Fall, an area has a large display of the red Hairy Pine-sap. Two smaller loops take off from this main trail. Here you can find the remains of the Jonathan White homestead.
The Trustees of Reservations.

Note: Undesignated Trails exist and may lead on to private property. Please respect our neighbors by staying on designated trails.

Source data obtained from 1:2,500 scale USGS topographic maps, field surveys, Global Positioning System (GPS), and the Massachusetts Executive Office of Environmental Affairs. Map and trail locations are approximate. November 2014.
Crow Hill Savannah
The Worcester Conservation Commission
The Greater Worcester Land Trust
The Commonwealth of Massachusetts
Ecotarium

Location: There are two entrances on Harrington Road.
1) across from North High School parking lot (140 Harrington Way)
2) across from the Ecotarium (222 Harrington Way)

Length: Several miles

Dogs on leashes are allowed.

This property is a beautiful Black Oak Savannah. There are large Black Oaks, meadows, wetlands and ponds. Many paths were originally carved by all terrain vehicles but they are weathering into good paths. Some scars from these vehicles can be found on top of the hill. The Greater Worcester Land Trust has blazed additional trails.

This property is a magnet for birds of many species and there is a diverse array of wildflowers. The pond, located in the Western corner of the property, is home to Painted Turtles and Mallard Ducks.

During wet weather, some of the paths may have standing water on them. I’d also suggest wearing long pants, as many paths are lined by various fast growing prickly shrubs.
Donker Farm, Donker Farm North and Cook’s Brook
Worcester
Greater Worcester Land Trust
City of Worcester

Location: 1) Tory Fort Lane: .30 mile from the intersection of Mower St. and Tory Fort Lane. There is a small parking lot on the right side of the road.
2) Parking is also possible along Moreland Green Drive, but is not ideal. You park near the sign with your car straddling the curb.
3) For an extended walk, park at Cascading Waters on Olean Street. Walk .10 mile South towards Pleasant Street and walk through Cook’s Pond.

Length: About 1 mile

Dogs on leashes are allowed on only part of the property. Dogs are not allowed in the animal enclosure.

Donker Farm is a great place to see farm animals. There are sheep, chickens and geese. The sheep are free to graze in the field and interact with you, but please do not enter the barn yard to engage them or approach the farmhouse, which is private property.

From the parking area you walk down a corridor past the barnyard and enter the rest of the property through a stile. The path continues down the field under the power lines. Follow the path into the woods, through a livestock gate. The main Blue Triangle path heads North to Cook’s Brook and Moreland Green Drive or you can head West to Donker Farm North.

A highlight of the property is Thinking Rock. Take the loop trail heading East up the hill to the Rock. In Summer, the view of the rock in a sea of ferns is inspiring. With the addition of Donker Farm North, the field under the power line with all of its wildflowers, is now available to explore. There is also a cart path from the Power Lines, that takes you through the woods to Tory Fort Lane.
As the Blue triangle trail passes through a livestock enclosure, No Dogs are permitted.
Eagle Lake
Holden
Mass Audubon Society

Location: From the intersection of Routes 31 and 122A in Holden, travel Northwest on Route 122A (Main Street) for about 1.50 miles. Turn left onto Causeway Street. Continue about .70 mile on Causeway Street (across the lake). Park at the pull off area on the left side of the road.

Length: 3 miles roundtrip

No dogs allowed.

This is a wonderful moderate hike that takes you on two loops through many different environments, including deciduous and coniferous woodlands, along wetlands, a brook and the lake.

Follow half of the Appleton Loop to a trail across the top of a municipal pipeline. This connects you to the Asnebumskit Loop. This loop takes you along Eagle Lake and Asnebumskit Brook. The actual path doesn’t take you down to the lake, but there are several places that are clear enough to get you closer to the water.

You complete the hike by retracing your steps over the pipeline and then doing the other half of Appleton Loop.

One caution. The entrance to both loop paths from the pipeline are marked with signs that may be obscured by vegetation. Look for a waist-high, small green sign with a white arrow.

Highlights include many stunning views of Eagle Lake and Asnebumskit Brook, along with the Cardinal-flowers that grow in the brook in August. Starting in mid-Summer and continuing through Fall, the area displays mushrooms of every color.
Eagle Lake Park
Swimming Picnic Area
Holden Department of Public Works

Location: Follow the directions for Eagle Lake, except instead of following Causeway Street to the right and crossing the lake, continue straight and park either on the left side of the road, or continue to the end of the road and park at the beach and recreation area.

Length: About .70 mile roundtrip

Dogs on leashes are allowed.

There is a short path that follows along the lake. If you parked on the left side at the beginning of the road, you will emerge from this wooded path on the beach, near the water. To complete the trip back to your car, walk along the road. In the Spring, the road is lined with azaleas and various wildflowers including a large area of Pink Lady’s-slippers.

Eagle Lake - Alder Trail
Holden
Mass Audubon Society

Location: From the intersection of Routes 31 and 122A in Holden, travel Northwest on Route 122A for about .90 mile. Turn left onto Kendall Road. Drive for about .40 mile until you see a chain gate on the right side of the road. There is a small pull-off diagonally opposite the gate. Space to park is very limited.

No dogs allowed.

This is a level, .90 mile loop trail that takes you through the woods, over a municipal pipeline and along Eagle Lake. On the Eastern side of the loop is a side path that takes you above the former beach area. From here you get some great views of Eagle Lake. The other two Audubon loop trails can be accessed by walking Southwest on the pipeline for .50 mile to reach the Asnebumskit Loop. You will be crossing private property when passing the houses along the pipeline.

Map’s symbol for going both directions
The East Side Trail is a green belt that extends from Cristoforo Columbo Park (East Park) on Shrewsbury Street to Lake Quinsigamond. The trail covers 3.44 miles (one way) and is very well marked with blue paint. There are “yellow” spur trails that link up with the main trail, as well as several other well marked trails that make up Green Hill Park. Accompanying the map is the official description of the trail. There is also a larger two page map. There are many places to park near this trail, so planning the length walk you want is easy. For this guide, the trail is divided into four sections.

Dogs on leashes are allowed.

1) Cristoforo Columbo Park to Route 9
Location: Park at either end. Shrewsbury Street near the park or at Bell Pond on Belmont Street (Route 9).

The Trail begins at the stone lions on Shrewsbury Street and follows the path across Cristoforo Columbo Park and into the woods. The climb through the forest and up the hill is short but very steep. This section ends with an easy walk along Bell Pond. There are birds, ducks, turtles and frogs in the marshy areas of the pond. This section is .625 mile, one way.

2) Route 9 to the Massachusetts Vietnam Veterans Memorial
Location: Park at the Vietnam Veterans Memorial or at Bell Pond.

If you start at the Memorial, take the time to enjoy the floral plantings, the walk along the pond, and the Memorial’s monuments. At the back of the Memorial, a short spur trail will connect you to the main trail. This portion of the trail is a combination of both paths and woods roads. A highlight of this section is the walk around the quarry, and the view of the countryside to the South. This is an easy .750 mile hike, one way.

3) Massachusetts Vietnam Veterans Memorial to Lake Quinsigamond.
Location: Park at the Memorial or along the side of North Lake Drive near the Boat Ramp.

From the parking area at the Memorial, you can access the main trail. Head East along the rocky path that takes you behind the Zoo and by a stone quarry. After crossing Skyline Drive this wooded trail become smooth and easy. You walk along a cliff and emerge from the woods at the 13th hole of Green Hill Golf Course. Your hike continues as you weave your way down the hill through a field, across walls, and streams. A highlight is following Coal Mine Brook as it cuts its way down the hill and takes you by dramatic Coal Mine Shaft. You will emerge from the woods at Plantation Street. This road has a lot of traffic, so be careful when crossing. You
finish the hike at stunning Lake Quinsigamond. This section is about 2 miles each way with an elevation change of about a 370’.

4) Trinity Woods to Lake Quinsigamond.

Location: Park on Trinity Avenue near the intersection with Bryn Mawr Avenue or along the side of North Lake Drive near the Boat Ramp.

This is a shorter alternate option for doing the Eastern end of the East Side Trail. Start at the Trinity Spur and follow the trail through the woods down to Coal Mine Brook. The trail divides; turn left (Northeast) on the Brook Loop. This loop takes you along Coal Mine Brook and then steeply up hill towards the apartment complex. Follow the path along side of the apartment complex and meet up with the East Side Trail. Follow this down to Lake Quinsigamond as in option 3. On the return trip follow the Trinity Spur to Trinity Avenue. One interesting feature is a bicycle wheel rim that has grown into two trees. This option is about 1 mile each way.
The East Side Trail was initially conceived in the mid 1980’s and envisioned as a continuous greenbelt linking East Park (Cristoforo Colombo Park) with Lake Quinsigamond. Construction of the trail commenced in the spring of 1997 with the original route being completed in a span of just over three weeks. Due to the construction of the Worcester Technical High School at Green Hill Park, a major portion of the trail was relocated away from the school site in the fall of 2003.

The current trail route begins at the twin stone lions marking the entrance to East Park on Shrewsbury Street. Following a walkway through the park, it then climbs steeply to the summit of Bell Hill. The once cleared summit with 360 degree panoramic views, has given way to successive reforestation, beginning with the regrowth of poplar and birch groves. In time, as the forest matures, hardwood species such as oak and maple will become more dominant. Limited views may still be seen to the north and west from the summit vista. Skirting the westerly shores of Bell Pond the trail soon crosses Route 9 and ascends a ledge slope entering into Green Hill Park.

The lands comprising Green Hill Park were first settled in 1755 by Thomas Green. The property passed from father to son until it was deeded to the City in 1905 with the understanding it would remain as a park in perpetuity. Passing an overlook of Bell Pond, the trail reenters the woods following cartpaths and a foot trail to the site of an old stone quarry, one of several on Millstone Hill. Much of early Worcester’s foundation stone and curbing was quarried from here.

Moving into the core of Green Hill Park the trail travels along a section of Lucy Lane, passing a spur trail on the left to the Vietnam Veterans Memorial, before turning back onto a network of serpentine foot trails. Continuing past the Barnyard Zoo and a small quarry the trail turns east and crosses Skyline Drive. At a cart road junction just north of the blue water tank, the East Side Trail rejoins its original route. The many stone walls in this section were built by a former patient of Worcester State Hospital. Working six days a week, never on Sunday and always alone, the several miles of remaining walls are testament to his more than thirty years of efforts.

Traversing an open field the trail runs alongside, then crosses a stone wall, entering the northerly portions of Green Hill Park. The trail descends through a high canopied forest to a junction with the Coal Mine Brook Loop at a small brook crossing. Heading east over private property, the trail crosses a paved drive before arriving at a ledge overhang, site of the old coal mine shaft. Known as Nackor’s mine it produced much coal at first but the coal was of poor quality and the mine was finally abandoned. Nearby Indians used the black lead as part of their war paint.

Passage over other private lands northeast of the shaft, permitted by a trail easement granted in June 2011, allows for an unbroken trail route of nearly 3.5 miles from Shrewsbury Street to Lake Quinsigamond and completes the trail after 14 years of efforts. A new access trail, the Trinity Spur, runs easterly from Trinity Avenue to the intersection of the Brook Loop and East Side Trail.
East-West Trail
Worcester
Park Spirit of Worcester, Inc
Friends of Newton Hill
Greater Worcester Land Trust

Location: The City of Worcester
Length: 14 Miles

Dogs on leashes are allowed.

The idea for a trail that linked together many of the City’s parks and conservation areas with city streets was imagined in 2001. It became a reality in the last few years. Following is a 2 page map of the trail. For addition information check out the Park Spirit website at parkspirit.org. They have an incredible amount of information on the history of the trail as well as the Parks, historic sites, restaurants and services that are along the route.
**EAST**

Begin at **RURAL CEMETERY** Gate. Walk SE on Grove St.  
Turn South onto Lancaster St and follow Salisbury Pond into **INSTITUTE PARK**  
There is parking along Salisbury St.  
Walk along the pond & exit onto Salisbury St. Head NW, crossing Park Ave.  
Turn SW onto Massachusetts Ave. Then NW on a path to Bancroft Tower.  
Walk through **SALISBURY PARK**, passing the Tower. Follow Bancroft Tower Rd. SW.  
Turn South onto Beechmont St. Turn West, then immediately South onto Haviland St.  
Turn East to Highland Ave, and continue into **NEWTON HILL**  
Follow the East-West Trail across the park.  
Parking is available at Doherty High School on the upper level.  
Turn East onto Pleasant St. Walk for about a block and  
Turn South onto Abbott St. Turn West onto Chandler St.  
**BEAVER BROOK PARK** - Cross Park  
There is parking off of Chandler St.  
Walk 2 blocks South on Mann St. Turn West onto May Street. Walk 2 blocks.  
Cross the street at Lovell Street and enter **HADWEN ARBORETUM**  
Cross the park. Exit by walking along the South side of the softball field.  
Cross the parking area and field at **COLUMBUS PARK**  
Parking is available here at Columbus Park.

**WEST**

Follow the path around Coes Reservoir, & walk North on Mill St.  
Turn West onto Midgley Ave for one block and then West onto Esper Ave.  
**TETASSET RIDGE** - Follow the path SW. At the intersection in **GOD’S ACRES** head North. At the next intersection, head West on the trail marked with red rectangles.  
Cross Airport Rd and head North on Airport land.  
Continue North along Airport Rd., turning West on Prouty Lane. Follow Prouty Lane to the intersection with Bailey St. Head East, then North on Sunny Hill Dr., at Pleasant St. Travel SE and continue North on Mower St. In .20 mile, bear right and head into **BOYNTON PARK**  
Parking is on the side of the road. Follow the road North for a short distance, head East on the Silver Springs Trail. (yellow triangles)  
Pass through **CASCADES WEST**  
Head SE on the Cascades Trail (blue circles), crossing **CASCADES PARK**. Continue East into **CASCADES WEST**. The trail ends at Olean St.  
Parking at Cascading Waters off Olean St.
WEST

Continued from East-West Trail - Western Section.

There is parking along Salisbury St.

Begin at the RURAL CEMETERY Gate. Head South on Grove St. Turn East and walk along Southern side of Rural Cemetery on Rural Drive.

Head South on Prescott Street and walk to Salisbury Street. Turn East on Salisbury Street and walk to Lincoln Street. Head Northeast on Lincoln Street and walk to Catharine Street.

Turn East on Northampton Street and walk one and a half blocks to GRANT SQUARE PARK.

Walk Northeast through the GRANT SQUARE PARK exiting the park at the intersection of Mount Vernon Street and Windsor St. Turn East on Mount Vernon Street and follow it to Channing Street. Head North on Channing Street for one block to the corner of Channing Street, Hermitage Lane, and the Southwestern corner of GREEN HILL PARK.

Enter GREEN HILL PARK and walk Northeast to Rodney Street. Cross the road and take the spur trail (yellow markings) of the East Side Trail. This trail will join with the East Side Trail behind the Massachusetts Vietnam Veterans Memorial.

There is parking at the Memorial.

Follow the East Side Trail, East, crossing Skyline Drive. Then continue Northeast passing the Green Hill Golf Course, and crossing a road in a condominium complex. The trail continues Northeast following Coal Mine Brook. It crosses the access road for the Notre Dame Health Care complex, Plantation Street and Lake Avenue before it reaches Lake Quinsigmond and the end of the East Side Trail.

Parking is available along the side of Lake Avenue.

EAST
Elmer’s Seat
Boylston
Greater Worcester Land Trust

Location: From I-290 East, take Exit 24, Church Street. Turn left onto Church Street (continuing as Central Street) and drive for 1.30 miles. Turn right onto Rocky Pond Road. Drive .10 mile and continue straight onto Warren Street. Continue for .20 mile and turn at your first left, Maple Way. Continue for about .50 mile and park near 31 Maple Way. You can also park near 14 Pleasant Lane. See the map.

Length: .75 - 1 mile

Dogs on leashes are allowed.

This property is located in a residential area, perched on a granite ledge surrounded by houses. There are a few spots where you can easily access this property. One spot is from the property sign near 14 Pleasant Lane. Head Southwest to start a moderate loop trail that is made up of former logging roads and recently blazed paths. The trail divides once you are in the woods and you can either continue Southwest or head Northwest. This Eastern side of the property features a wetland, glacial boulders and a vantage point that overlooks a vernal pool. The granite ledges are covered with various mosses and lichens and the glacial boulders have both Smooth Rock Tripe and Toadskin Lichens on them.

On the Western side of the property, park across from 31 Maple Way. From this side you can start the loop with nice views of Mt. Wachusett and the surrounding countryside.

Highlights begin in the early Spring when the Shadbush in bloom. As Spring ends, you’ll see extensive areas of Whorled Loosestrife. Summer brings blueberries and huckleberries and the Fall, a colorful view.

The property is only seven and one-quarter acres, but it is fun to explore and find new things. The Greater Worcester Land Trust is putting up property boundary signs at key points of the trail. Please respect our neighbors by not wandering on to their properties.
Frank Cooke Forest
Greater Worcester Land Trust
The City of Worcester
Leicester

Location: 1) Route 56 at the intersection with Washburn Street. Park on the side of Washburn Street.
2) Manville Street: .80 mile South from the intersection on Route 56. Park near the gate on the side of the road.

Length: About 2 - 2.50 miles

Dogs are not allowed.

To reach Frank Cooke Forest, from either entrance, walk .30 mile on a cart road through City of Worcester Reservoir property. This rocky road is lined with majestic Sugar Maples and oaks. At the midway point, you will reach a North-South cart road. Walk around the gate, and follow this cart road South. You will be entering Frank Cooke Forest shortly after you cross Kettle Brook. This road forms the Northern boundary of the property.

Currently, the main path is the maintenance road that runs the length of the power lines. There is a wide variety of shrubs, blueberries and raspberries. You’ll also find wildflowers like Black-eyed Susan, Whorled Yellow-loosestrife, St. John’s-wort, Yarrow, and Joe-Pye weed along this corridor. The towers are numbered and the map can help you follow your progress through the property. You will find many birds, and possibly a White-tailed deer.

At the Southeastern corner of the property is a beaver wetland. It’s fun to see the seasonal changes that take place. Plants like Sphagnum Peat Moss, cattails, Swamp Yellow-loosestrife, American Burnweed and Winterberry can be observed. There currently is a Red-tailed Hawk nesting on the edge of the wetland.

In Spring you can find ephemeral flowers like Red Trillium, Wood Anemone, Sessile-leaved Bellwort and Solomon’s-seal in the woods. Soon there will be a trail blazed through the woods, that will take you to the wetland and then out to the power lines, forming a loop trail. As you would after any hike, be sure you do a tick check when you leave.
God’s Acre or Deed Rock, Tetasset Ridge, Fowler Brook Gorge and Fowler Brook South Fork
The City of Worcester
The Greater Worcester Land Trust

Location:

1) **Deed Rock** is located East of the airport. Parking is difficult because the roads that access this area are in poor condition. There is a small area for parking near Deed Rock, but Swan Avenue can be barely passable. The easiest place to park is the lot on Outlook Drive, near Swan Ave. It is about a .50 mile walk up Swan Avenue to Deed Rock. (See map for other parking ideas.)

2) **Tetasset Ridge** is located off of Mill Street. Turn right (West) onto Midgley Avenue, then left onto Esper Avenue. Each of these roads is only a block long. There is a parking area at the end of Esper Avenue on the right side. From here it is a short .60 mile uphill hike to intersect with the “blue square” trail in God’s Acre.

3) Park near **Logan Field**, located at the intersection of Mill Street and Airport Drive. Starting at the concession stand, walk between the two fields and follow the “blue square” trail up the hill to Deed Rock. It is about a 1.50 mile walk, each way.

4) **Airport Road**. Park on the side of the road by the Fowler Brook South Fork sign.

Length: There are miles of paths and dirt roads.

Dogs on leashes are allowed.

Solomon Parsons deeded these 10 acres to God in 1840. The “deed” was chiseled into a large rock. Today, you can find Deed Rock located at the base of Rattlesnake Ridge. In the Spring, Red Trillium and Wild Sarsaparilla grow near the “rock”. There is a loop trail that passes by Deed Rock. You climb over boulders up the steep ridge. The Greater Worcester Land Trust has also blazed an easier .10 mile trail to the left, that avoids the difficult climb. On top, there is a beautiful corridor of Paper Birches and Mountain Laurel. Other highlights include the “open area”, used by the city in the winter to warehouse extra snow. In the summer and fall it has wildflowers, and offer an excellent view of the city.

**Tetasset Ridge** has many features besides being a convenient place to park for God’s Acre. The woods have a variety of trees including some venerable Sugar Maples. There are several vernal pools and a stream. White-tailed deer, dozens of Wild Turkeys, and numerous woodpeckers make the area their home, and unusual flora like Maidenhair Ferns, White Baneberry, and Blood-root grow here.

**Fowler Brook Gorge and Fowler Brook South Fork** are two newer properties that you travel through if you hike from Logan Field. You follow along the bank of Fowler Brook and its impressive gorge. Fowler Brook South Fork’s Northwestern boundary is on Airport Drive. There is a short spur trail that takes you to the main “blue square” trail.
Hadwen Arboretum
Worcester
Clark University

Location: Hadwen Arboretum is located at the corner of May and Lovell Streets. Parking along either street is impossible. The best place to park is at the parking lot at Coes Reservoir/Columbus Park. This parking lot is located at the Northwest end of Englewood Avenue. Parking is also available at the Knights of Columbus. From here walk Northeast to Clark University's softball field. Walk along the right side of the field and climb up the hill into Hadwen Arboretum.

Length: up to several miles

Dogs on leashes are allowed.

In 1907 Obadiah Hadwen left this property to Clark University for use as an Arboretum to educate students in the art and science of arbor culture. In 1978, Clark students cataloged 40 different types of trees. Today, many of these trees remain.

There are two parallel dirt roads that cross the property as well as numerous other paths. Besides the huge diversity in the trees, there are many wildflowers. One unusual Spring flower is Dutchman's-breeches which is in bloom around the same time as Blood-root and Siberian Squill. Another stunning display is the White Wood-asters that blanket the forest floor in the fall. This is an easy property to navigate. The map that follows shows the paths that were present in the Spring of 2017. Depending on the trail maintenance, some of these paths may disappear and others may be newly blazed.
Hadwen Park
Worcester
City of Worcester

Location: The main entrance to Hadwen Park is located on Heard Street .20 mile from Stafford Street. Immediately after the railroad tracks turn left into the parking area.

During the winter the parking area on Heard Street is blocked off. Parking is available on the side of Knox Street on the Eastern side of the park.

Length: 3-4 miles

Dogs on leashes are allowed.

This park has many diverse features. There is Curtis Pond and the wetland associated with it, a brook, a forest, and an esker. There is a series of paths that cross each other affording the hiker many route options. The section of Knox Street that runs through the park is now a walking path that links many of the trails together. The paths accessing the esker often have dramatic elevation changes. A Barred Owl inhabits these woods.

This park is enjoyable to visit at any time of the year. The inhabitants of the pond change with the seasons. Mute Swans, Cormorants, Mallard Ducks, Canada Geese and Great Blue Herons are spotted at various times of the year, and there are a variety of diving ducks that visit in the Fall and Winter.
Henrickson Orchard
Holden
White Oak Land Conservation Society

Location: Chapin Road. From the intersection of Bailey Road and Chapin Road, drive .10 mile South on Chapin Road. Park either on the left side of the road or near the property sign.

Length: 1 to 2 miles

Dogs on leashes are allowed.

This a small beautiful 14-acre property that boasts a variety of habitats. There is an orchard, field, White Pine grove, woodlands, wetlands, and a stream. Trails have been blazed to make all of the areas accessible.

The apple orchard has goldenrod and Stiff Asters among the trees. The meadow is highlighted with Squarrose Goldenrod, meadowsweet and a host of butterflies and dragonflies. The wooded areas have stone walls lined with ferns and Sweet-pepperbush. After a rain, Red Efts are easy to find along the paths. In the fall, there is a brilliant display of many types of mushrooms. Bridges help you cross the stream. One bridge found on a woods road is an unusual old stone construction.

White Oak Land Conservation Society

0 0.02 0.04 0.06 0.08 0.10 mile

7/17
Illig Pond Conservation Area
Paxton Recreation Commission Trail System
Paxton
Paxton Conservation Commission
Commonwealth of Massachusetts

Location: Take Route 122 to the center of Paxton. At the lights, turn South onto Route 31 (West Street). Turn left at the first road, Shanandoah Drive. This road looks like the parking area for Paxton Center School. Pass the school and drive to the end of the road. The trail begins to the left of the property sign. Park nearby.

Length: 1 - 2 miles

Dogs on leashes are allowed.

This is a charming property. There are two loop trails that take you through a diverse woodland that features a stream, wetlands and variety of trees and plants. There is a large expanse of Mountain Laurel and several nice areas of Hobblebush. You emerge from the woods at Illig Pond. This is a beautiful pond. It has cattails at the Western end and water-lilies throughout. You will find many birds and dragonflies here. There are several benches along the pond, that let you pause and enjoy the serenity of the place. The trail exits near to where you started. The pond doesn’t stop here: you can follow the road/parking area West along the pond and take some little side paths through the woods to the pond. Like the main path, there is a variety of wildflowers here including some Pink Lady’s-slippers.
Location: 1) From the intersection of Park Avenue (Route 9), Main Street, and Stafford Street, drive South on Stafford Street for 1.30 miles. Park on the right side of the road at the gated lot of Bulbs.com or at Worcester Academy’s “New Balance Fields”.

2) The new GWLT sign is located at Kettle Brook Lofts, (1511 Main Street (Route 9), at the Northern end of the trail. There are several parking spaces by the sign. You can also park at the GWLT gate on Aldena Road (see map).

Length: 2 to 3 miles

Dogs on leashes are allowed.

This is an easy hike except for some short steep areas. Worcester Academy’s fields were designed to fit neatly within the space bordered by Kettle Brook. From Stafford Street parking, you follow a wide dirt path along the brook. The path is well marked with white paint. Even rocks or roots on the path are painted to help Worcester Academy’s cross-country runners. The path has a wide variety of woodland flora, including Red Trillium, Solomon’s-seals, Wild Sarsaparilla, and Hobblebushes, and the brook has several types of fish in it.

If you start from Stafford Street, there is a side path that heads to the right (East) after about .75 mile. There is a gorge and the remnants of a large stone dam. Depending on the time of year and water level of the brook, you can explore the area around the dam.

The path that continues straight (North) goes for about .20 mile to the property boundary. Beyond, follow the dirt road to The Kettle Brook Lofts condominium development. The lofts are situated on the brook, and on top of a nice waterfall. The car bridge crossing the brook and the Greater Worcester Land Trust sign, both overlook the pond.
KinneyWoods & Cook’s Woods
Worcester, Holden
City of Worcester
The Greater Worcester Land Trust
White Oak Land Conservation Society

Location: From the intersection of Pleasant and Chandler Streets (in front of the Santander Bank), take Mower Street for about .15 mile, bear slightly right onto Olean Street. Continue for .70 mile and turn right onto Dawson Road. Drive .50 mile to the end of Dawson Road. (The last .20 mile is unpaved and has many potholes.) Park in front of the gate. Please don’t block the private driveway.

Length: 3 miles or more

Dogs on leashes are allowed.

This is a beautiful hardwood forest. Various conservation groups have combined to form a truly wonderful collection of properties: KinneyWoods, Cook’s Woods, and Holbrook Forest (see next page). The Cook’s Path (blue blazes) heads East to Brigham Street. You will cross some streams, stone walls and power lines. On the return trip, take the Crystal Pond Loop (red blazes) that heads North, then West along the Worcester/Holden town line. This trail ends near scenic Crystal Pond. There is an understory of Mountain Laurels and Paper Birches that make a stunning contrast against the pond.

The Dresser Loop (yellow blazes) takes you North along streams, crosses wetlands and climbs hills. In the Spring you will find Red Trillium, Dwarf Ginseng, and Wood Anemones along this path and Marsh-marigolds and American False Hellebore in the streams. One highlight near the top of the Dresser Loop is a huge glacial boulder with a Black Birch growing out of it. You can access Holbrook Forest on a short spur from Dresser Loop.

The Cross Loop Trail (red triangle blazes) takes you to the property’s Northwestern corner where you will find the stone wall boundaries forming a cross. The Greater Worcester Land Trust has built a tent platform just off of the Dresser Loop. Camping is offered by permission. For information please check the GWLT website; Camping on GWLT Lands.

Hunting is allowed in the Holden portion of the property, so wearing bright colors during Hunting Season is recommended. Hunting is not allowed on Sundays.
Holbrook Forest  
Holden  
White Oak Land Conservation Society

Location: From the intersection of Salisbury Street and Fisher Road in Holden, take Fisher Road West for .60 mile. The parking lot is on the left side of the road.

Length: 1.50 miles and more depending on the paths walked

Dogs on leashes are allowed.

This property joins KinneyWoods and Cook’s Woods on the Worcester/Holden boundary. This trio of properties offer a wide variety of hiking options. In contrast to the other two properties, Holbrook Forest is relatively flat with broad paths, remnants of old logging roads. The open areas created from logging activity have created a place for wildflowers, blueberries and blackberries to grow. In the fall the brilliant red leaves of the blueberries line the paths.

To lengthen your hike, take the KinneyWoods Loop to a short path that connects you to the Dresser Loop in KinneyWoods. This enables you to walk the entire combination of properties.

The Wall Trail follows a beautiful stone wall property boundary. Another highlight is Cousins’ Rock, a former meeting place for children. This quartz glacial erratic is nestled in a dense grove of young White Pine trees.

This is a multi-use property. Wear blaze orange or other bright clothing during hunting season. No hunting is permitted on Sunday.
Lake Park
Worcester
City of Worcester

Location: Lake Park is located on Lake Avenue about a mile South of the intersection of Route 9 and Lake Avenue. From Lake Avenue head West up Hamilton Street. There is a parking lot near Tivnan Field and another parking area a block West on Coburn Avenue across from Morano Field.

Length: 3-4 miles

Dogs on leashes are allowed.

Lake Park has well established paths that are easy to walk on. The trails are under a canopy of towering oak trees, but there is sufficient open area to allow wild flowers to flourish. There is a path that takes you along a wetland that offers a different ecology. The paths intersect to create many walking options. Currently, the paths are marked only at major intersections.

The following map has been modified from the one posted, to reflect the paths that are currently being used.
Moore State Park
Paxton
Commonwealth of Massachusetts

Location: Take Route 122 to the center of Paxton. At the lights, turn South onto Route 31 (West Street). Travel about 1.30 miles. Bear right onto Mill Street. The parking area will be on the left.

Length: 1 mile and up

Dogs on leashes are allowed.

Moore State Park is a combination of spectacular cultivated displays of rhododendrons and azaleas with paved paths, and easy hiking paths through the woods on this former estate.

Moore can be enjoyed all year round. The paved paths are plowed in the winter.

Some highlights in the cultivated area include:
- the floral displays in early June
- the Artist Overlook - inspirational view of the 1740’s sawmill
- the waterfalls and ponds
- Cardinal-flowers in August

The hiking paths feature:
- a 1 mile DCR “Healthy Heart” trail.
- spectacular ledges and outcroppings
- views of the pond
- beautiful native flowers like Pink Lady’s-slippers
Moreland Woods
Worcester
The Worcester Conservation Commission
The Greater Worcester Land Trust
The Commonwealth of Massachusetts

Location: The entrance to Moreland Woods is at the top of Moreland Street, on the section that leads down (East) to Salisbury Street. A green sign marks the trailhead (see Northern portion of map). Park on one of the side streets.

Length: .50 -1 mile

Dogs on leashes are allowed.

Follow the access corridor to the trail that circles the property. This trail takes you near the wetlands, winds through the woods, and follows a stream. In the wetland areas you can find Marsh-marigolds in the Spring and asters in the Fall. This area is full of birds and wildlife. Wild Turkeys are often seen or heard, along with many other bird species including Barred Owls, Red-bellied, Downy and Pileated Woodpeckers, Northern Cardinals, and American Robins. A pair of White-tailed Deer was also spotted recently. You complete the loop in an evergreen grove of White Pine and Eastern Hemlock.
Newton Hill
Worcester
City of Worcester

Location: Behind Doherty High School and bordered by Pleasant Street and Park Avenue.

Length: Paths vary from a few tenths of a mile to a mile or so.

Dogs on leashes are allowed.

There are several well maintained and marked woods roads and trails, as well as some well-traveled unnamed trails. The park includes an 18-hole disc golf course, as well as a 12-station Fitness Course. The disc golf course crosses the paths, but golfers are respectful of walkers. The course is used mostly in late afternoon and on weekends.

The trails are lined with oak, birch and White Pine trees which are a haven for birds, squirrels, and chipmunks. You also get a lot of exercise walking up and down the hill. It’s fun to cross-country ski and snowshoe here in the winter.

Elm Park
Worcester
City of Worcester

Location: Bordered by Highland Street, Park Avenue, Elm Street, and Russell Street

Elm Park has two miles of tree lined walking paths, that take you by a large pond spanned by two foot bridges. There is a playground and areas for varied outdoor activities. The Morse Stroll is the .750 mile walk around the perimeter of the the park.
Nick’s Woods
The Greater Worcester Land Trust
Worcester

Location: Nick’s Woods is located in the triangle formed between Grove and Holden Streets. The property sign is located on Grove Street, but the best access to the property is from Smith Lane. Smith Lane is located off Holden Street, just South of the intersection with Brattle Street. The entrance to the property is at the end of Smith Lane. There is room to park a few cars on the left side. The trail is the dirt road on the left. The road to the right is a private driveway, so please don’t block it.

Two other places to park are across Holden Street at the Trilife Church (formerly the Triumphant Life Church) or along the side of Stetson Road. It’s a short walk down Smith Lane to the trailhead.

Length: 2 - 3 miles

Dogs on leashes are allowed.

The main path is a rocky dirt road that runs along the North side of Sargent Brook. It is an easy walk that takes you from Smith Lane to the end of the property at the power lines. There are several route choices near the Northeast end of the road. A fun detour is walking out on the old dam. It offers a great view looking down the brook. Many different flower species decorate the banks. You can return following the same dirt roads back to Smith Lane or follow the “Yellow-Triangle Trail” that crosses Sargent Brook near the power lines. This path takes you to the South side of the property, where you hike through woods which feature Mountain Laurel and Witch Hazel. This side gives you a good look at the old dam and brook, as well as taking you through a large boulder field on the “Glacial Erratic Trail”. The trails on the Southern side of the brook are more challenging with several stream crossings.
Oak Hill and Waterman
Holden
White Oak Land Conservation Society

Location: Starting from the Worcester/Holden line on Salisbury Street.
1) Drive about .30 mile North. Turn right on Jordan Road, the new Oak Hill residential development. Park on the side of the road, away from the construction, near Lot #1 (see map).
2) There is a new parking area on Salisbury St. at the Waterman property. It is about .50 mile North of the Worcester/Holden line.

Length: 1 - 2 miles

Dogs on leashes are allowed.

White Oak Land Conservation Society holds the Conservation Restriction on the property that surrounds this new development. A loop trail that incorporates existing woods roads, new paths and easements, has been blazed on the Western part of the property. It also runs through the wooded center of the development. A short trail has been flagged to take you by a huge glacial boulder at the edge of the wetland.

This is an interesting property; the trail follows Poor Farm Brook and its tributaries. There is a mixture of deciduous and evergreen trees and the ground is covered year round with Wintergreen and at least three types of club mosses. In the Spring, Marsh-marigolds appear in a wetland area and Canada-mayflower, Wood Anemone, Dwarf Ginseng, Starflowers and Fringed Milkwort grow along the trail.

A trail has been blazed from the Waterman parking area on Salisbury Street, that connects to the main loop trail. It is a .30 mile trail that winds through the woods passing several vernal pools and a very large White Oak tree. This tree has recently been named for Nancy Wilson, a long time White Oak board member and conservation advocate. A short trail will be blazed to the oak and a memorial bench placed beneath it.
This trail system is still being developed. If parking in the development, park on the side of the road, out of the way of construction.
Oxbow National Wildlife Refuge
Harvard, Lancaster, Shirley, Ayer
U S Fish and Wildlife Service

Location: 1) Bill Ashe Visitor Facility, Bill Ashe Trail
80 Hospital Road, Devens
From Route 2 East, Take exit 37, Jackson Road. Drive 1.30 miles on Jackson Road. Turn Left onto Givry Street and drive .20 mile. Bear left onto Spruce Street and drive .20 mile. Visitor Facility will be on the left. See map.
2) Riverside Trail, Turnpike Trail and Tank Road:
Still Water Depot Road, Harvard, MA
From the intersection of Routes 110 and 117 in Harvard, travel 3 miles North on Route 110. Turn left onto Still Water Depot Road. Drive approximately .60 mile. Cross the railroad tracks, the parking area will be on the right.
3) Esker Loop Trail: Off Walker Road in Shirley.
From Route 2 East, Take exit 36 towards Shirley Road. Take Shirley Road for about 2.20 miles. Turn right onto Main Street and continue for 1.80 miles. Turn left onto Walker Road, cross the railroad tracks, and drive .80 mile. The Refuge will be on the right.

This refuge was established in 1974 beginning with land transfers from the Department of Defense. It now encompasses 1667 acres and protects 8 miles of the Nashua River. Trails are being developed for people to be able to observe nature.

No dogs allowed.

1) Bill Ashe Visitor Facility, Bill Ashe Trail, Devens, MA
There are outdoor displays to read, a composting toilet and a Pavilion for special events. Bill Ashe Trail is an easy walk on a moved power line trail. The Boathouse trail is a short walk to the Nashua River and the brick remains of a boathouse. The Lake George trail is another short trail that takes you to a wetland pond. There is canoe access from a parking area that is just West of the Visitor Facility on Hospital Road.

2) Riverside Trail, Turnpike Trail and Tank Road, Harvard, MA
This is a level 1.90 mile loop trail that takes you along the Nashua River and through wetlands. There are numerous wooden bridges and walkways over the wetter areas. During wet periods, part of the trail can become temporarily flooded. There are 12 stations around the loop that help describe the natural world around you.

The Goddard Trail can be accessed by walking North on the Tank Road.
See the U.S. Fish and Wildlife Service website at http://www.fws.gov/refuge/Oxbow/visit/plan_your_visit.html for more information.

3) Esker Loop Trail, Off Walker Road in Shirley.
This is a 2 mile hike. Start by following the dirt road and walking next to an esker. After about .50 mile you turn right and climb steeply up onto the esker. Follow the top of the esker for about another .50 mile. From this vantage point, you get great views of the Nashua River and the forest around you. At the end of the property, there is another very steep climb back down to the dirt road. Return to the parking area on the dirt road.

http://www.fws.gov/refuge/Oxbow/visit/plan_your_visit.html
Parson’s Cider Mill and Marois 28
Worcester
Greater Worcester Land Trust

Location:  
Parson’s Cider Mill: Intersection of Goddard Memorial Drive and Apricot Street. Robert H. Goddard Memorial is on the corner. The parking area is West of the Memorial, on the right hand side of Apricot Street.  
Maires 28: parking along Beatrice Drive is suggested.

Length:  1.5 miles and up

Dogs on leashes are allowed.

The Parson’s Cider Mill section of this property is an easy walk along dirt woods roads. It begins at the former Mill’s foundation, situated over a stream. The path takes you along two man-made ponds and a stream. You can walk around the second pond. In the Spring there is a large expanse of Bloodroot along the path and Marsh-marigolds along the streams. Mallard Ducks and Canada Geese are mating and nesting near the ponds.

The second property, Marois 28, is connected by a path from the far end of the second pond. You can walk either direction around a wetland area. To the right you pass a drainage channel from Goddard Memorial Drive. Continuing, you walk on a narrow path on the border of the wetlands, reaching a cinder road that takes you up the hill to Goddard Memorial Drive. You emerge from the woods across from Beatrice Drive. From the cinder road, several other paths head North along a wetland.

Walking to the left you pass a campfire site and the wetland. In August there is an explosion of Cardinal-flowers, Monkey-flowers, Joe-Pye weed and Jewelweed. A trail has been blazed that completes a loop trail around this wetland. This trail is very rocky and has a stream that needs to be crossed, so the footing is precarious in this area.

The only drawback to this property is that it is located behind two schools. There is usually some litter along the paths. Trash can be deposited in the receptacle at the Goddard Memorial located a few yards from the parking area.
Patch Reservoir
Worcester
City of Worcester

Location: Mill Street .40 mile South of the intersection of Mill Street and Airport Drive. There is a sign for Patch Reservoir and a wide shoulder on the East side of the road that accommodates parking for several cars. Canoes and non-motorized boats can put in here. To locate the path, walk South for about a minute and enter the woods beyond the house with the white plastic fence (464 Mill Street).

Length: 1 - 1.50 miles

Dogs on leashes are allowed.

This begins as a moderate hike. There is a well established path that runs along the edge of the reservoir affording terrific views of the water and the Mute Swans that frequent the area. The first portion of the trail has recently been rerouted to remove some of the more challenging parts of this path. There still may be some poison ivy to avoid. After you reach Tatnuck Brook and head North the trail becomes wider and much easier. The area is honeycombed with intersecting small paths. You end up at a stepped waterfall that is impressive in the Spring or after a heavy rain. Complete the walk by returning the way you came.

A new path has been flagged from the waterfall that heads South rejoining the main path, forming a loop. A second loop trail has been flagged that takes you along the stream and through the woods. This will create many more hiking options.
Perkins Farm
Worcester
Worcester Conservation Commission

Location: Route 122 - Grafton Street. Located at the Perkins Farm Marketplace. Drive behind the right side of the Stop & Shop. There are signs that designate where to park, behind the building near the trailhead.

Length: There are many different trails that crisscross this property. You can walk as far as you want, for up to several miles.

Dogs on leashes are allowed.

This is the site of one of the last farms in Worcester. It is an area which is forested with beautiful large oak trees that form a majestic canopy over the property. There is a short uphill climb to get into the property, but after that, most of the paths are relatively flat. The understory contains blueberries, Bracken Ferns, Sweet-fern, Sassafras, Yellow Wild Indigo and other wild flowers. In the Spring, one trail has a cluster of Pink Lady's-slippers.

Another highlight is the view overlooking the railroad tracks and Lake Quinsigamond from the extension of the Tiger Beetle Trail. The view is especially memorable in the Spring and Fall when the leaves are off the trees. One caution - don't venture out onto the railroad tracks. These are two active CSX tracks and trains regularly come by at high speed.
To Protect the Environment
No motorized vehicles, dumping, fires, hunting, firearms, trapping, alcoholic beverages, or tree cutting. Do not pick flowers or remove plants.

Parking
Pierpont Meadow
Dudley
Mass Audubon Society

Directions: From Worcester head South on I-290 to I-395. Follow I-395 South to exit 4B to Oxford Center. At the traffic light in Oxford center continue straight onto Charlton Road. Follow Charlton Road for .70 mile and take a left on Dudley Road (not Old Dudley Road). Go approximately 3 miles and take a right on Marsh Road (not Henry Marsh Road). The sanctuary is 0.25 miles on your left.

Length: Several miles

No dogs allowed.

Pierpont Meadow is a combination of many environments that make this a fun place to explore. There are wetlands and a meadow with a mown path around it. Here you can find beautiful flowering plants and dozens of species of butterflies and dragonflies throughout Spring, Summer and Fall. The woodlands are dominated by towering White Pine trees. In the Spring you can find Fringed Milkwort and Pink Lady's-slippers along some paths. Pierpont Meadow Pond has Bullhead pond-lilies and White Water-lilies floating on the surface, and Sweet-pepperbush along the shoreline. There is often a Great Blue Heron hiding somewhere around the pond. The whole property attracts many species of birds. All of the different woods roads and paths are relatively flat and smooth, and easy to walk.

Near the pond is a cottage that can be rented. Near the cottage there is access to the pond for swimming and canoeing. A canoe is included with the cottage rental. Check with Mass Audubon for details.

Website: [www.massaudubon.org/get-outdoors/wildlife-sanctuaries/pierpont-meadow/about/cottage-rental](http://www.massaudubon.org/get-outdoors/wildlife-sanctuaries/pierpont-meadow/about/cottage-rental)

Central/West Regional Property Office
Phone: 978-464-2712 Ext. 8702
email: centralproperties@massaudubon.org
Pine Glen  
West Boylston  
The Greater Worcester Land Trust

Location: From the junction of Routes 12 and 140 in West Boylston, drive North on Route 140 for about .50 mile. Just before a railroad overpass, turn left onto Goodale Street. Drive for .60 mile, Pine Glen will be on the left side of the street. Continue past Pine Glen and turn left on to Marsh Hawk Way. Park on the side of the road.

Length: Less than half a mile

Dogs on leashes are allowed.

There is a very short moderately easy trail that takes you into the glen. The path follows and crosses a seasonal stream as it meanders through the property. In Spring there are daffodils and periwinkles that line the trail. Summer brings Greater Celandine and Dame’s-rocket, followed in late summer by a massive display of Jewelweed. In winter you can follow deer tracks down the path. This property gives you the opportunity to get out into nature without walking very far. Under a White Pine you’ll find a bench beside the stream.
Porcupine Hill & Potter Sanctuary
Holden/Paxton Line
White Oak Land Conservation Society

Location: Porcupine Hill is on Route 31 on the Paxton/Holden Line .40 mile West of South Road in Holden. Potter Sanctuary is about .10 mile further West. Park on either side of the pull off.

Length: 2 - 3 miles

Dogs on leashes are allowed.

These are a pair of lovely adjoining wooded properties. There are well-marked trails that combine for a variety of easy hikes. Blue markers indicate going out and yellow markers indicate that you are returning to the Porcupine Hill parking lot. White markers return you to the Potter Sanctuary parking area. It is also easy to walk the .10 mile distance between the two parking areas on the highway.

Porcupine Hill: This hike begins on the Peabody Family Trail. This trail is narrow in sections and takes you through dense thickets of Mountain Laurel. You’ll find Sweet-pepperbush and Indian Cucumber-root along the sides of the trail. There are some rocks, stumps and roots to look out for. Damper areas have wooden bridges over them. You continue the climb up the hill over granite ledges on the Wilson Way loop trail. You will pass a picnic table set off on a nice ledge. For a longer hike, you can access the Summit Loop and Hemlock Path from here.

Potter Sanctuary: Follow the winding dirt road North. Take the Newton Trail on your left. In Spring, Fall and Winter when the leaves are off the trees, there is a nice view of Asnebumskit Pond. This trail takes you to Porcupine Hill’s Peabody Family Path where you have a choice of going North to the summit loop trails, or heading South to a connecting path that takes you past Potter Lodge and to the dirt road that returns you to the Potter Sanctuary parking area.

In the Spring these properties are alive with flowers such as Fringed Milkwort, Clintonia and Pink Lady’s-slippers. In mid-June this is one of the best places to see a spectacular display of Mountain Laurel. In the Fall, asters and Witch Hazel are in bloom.

This is a multi-use property and hunting is allowed. During hunting season please wear bright clothes. Hunting is not allowed on Sunday.
Potter Sanctuary and Porcupine Hill
Paxton and Holden, MA

- Property Boundaries
- Stream
- Wetlands
- Picnic Table

Trail Markings
- Blue blazes are heading away from the parking area.
- Yellow blazes are returning to the Porcupine Hill lot.
- White blazes are returning to the Potter parking area.

During hunting season, bright colors are recommended for people and pets.

Asnebhumskit Pond

White Oak Land Conservation Society
Poutwater Pond
Holden/Sterling Line
Wachusett Reservoir Watershed
Massachusetts Nature Preserve Council

Location: From the intersection of Routes 122A and 31 in Holden, drive North on Route 31 for 3.10 miles. Turn right onto Mason Road. Travel for 1.20 miles, then turn right onto Sterling Road. Drive for 1.60 miles to the Holden/Sterling town line. Park in the lot on the left side of the road.

Length: 2 miles

No dogs allowed.

Poutwater Pond has a bog. The bog is a wonderful, colorful world of plants only associated with bogs. There are Purple Pitcherplants, Swamp-loosestrife, Small Cranberries, Spatulate-leaved Sundews, Arrow-arums, Bog Laurels, as well as Calopogon, Rose Pagonia, and White-fringed Bog-orchids. You’ll also find a wide variety of dragonflies and butterflies. To get to the bog, you follow dirt logging roads through the woods for about .70 mile. Turn right at the first intersection and then left at the next two cross roads.

The path through the bog is a series of plastic walkway sections, that have a one inch square grid pattern. When entering the bog, be careful stepping onto the first section: the walkway will sink. I’d suggest that you move onto the second section before anyone else enters the bog. This walkway was rebuilt in 2012 and is currently in good shape, but sphagnum peat moss is growing through the grid-work. As the peat moss continues to grow, it will completely obscure some of the walkway. Even now, be careful not to step in the gaps between the sections.

As of the Summer of 2017, if you are careful, your feet will probably not get too wet, but in the past I have suggested changing into old sandals (like Tevas) and old socks just before you enter the bog.

This is a multi-use property. During hunting season, wear bright colorful clothing. No hunting is permitted on Sunday.
Special Instructions

In 2012 the walkway in the bog was rebuilt. Now, if you are careful entering the bog, you probably won’t get wet, but it isn’t a bad idea to follow the following instructions.

Wear your normal sneakers or hiking boots.
Bring the following:

1) An OLD pair of Teva sandals or OLD sneakers
2) An OLD Pair of Socks. (Change just before you go into the bog.)
3) A plastic bottle filled with water to rinse your feet. (one bottle will rinse off 2 people)
4) A small OLD hand towel to dry off with.
5) A plastic bag to put wet things in, to carry out.
Purgatory Chasm State Reservation
Sutton
Commonwealth of Massachusetts - DCR

Location: From Route 146 take Exit 6, Purgatory Road. Continue West for .25 mile to the Reservation’s entrance and the visitor center.
Daily Parking Fee: $ 5.00 for MA Vehicle
$10.00 for Non-MA Vehicle

Length: 4 miles

Well behaved dogs on leashes are allowed.

If you grew up in this area, you probably took a school field trip to Purgatory Chasm. This property is more than the Chasm. There are miles of moderate to difficult trails around the chasm, including a DCR “Healthy Trail”. Most of the dirt roads and trails involve elevation changes and there are many tree roots and rocks that need to be avoided. There is a vernal pool to be explored in the Spring and mushrooms of every color, shape and size in the Fall.

The chasm itself is a unique natural landmark that is .25 mile long with granite walls rising 70 feet on either side. The chasm is thought to have been formed near the end of the last glacier, 14,000 years ago. There is a visitor center that has displays that explain the geology as well as the history and flora and fauna of the area. There are several picnic areas.
Please:
- Be aware - chasm rocks and slopes are slippery: wear rubber-soled shoes or hiking boots.
- Stay away from the edges of the chasm.
- Keep dogs on a leash.
- Do not pick flowers or other vegetation.
- Deposit trash in receptacles.

Please No:
- Alcoholic beverages.
- Rock climbing without a special permit.
- Open fires.
- Mountain bikes in or around chasm area or in picnic areas.

Park Hours:
- Sunrise to sunset, daily. Open year-round.

Rock-climbing Permits:
- To obtain a permit, please apply at the Park Headquarters. Bring your climbing gear.
- If a Serious Injury Occurs, Do Not Move the Victim. Find a park employee or use the pay phone at the pavilion to call the Police at 911.

Trail Use Guidelines:
- Stay on designated trails and roads.
- Observe all posted rules and regulations.
- Motorized vehicles prohibited.
- Be alert for other trail users.

Trail Lengths:
1. Chasm Loop Trail - 5 miles
2. Charley's Loop - 1.0 miles
3. Old Purgatory Trail - 7.5 miles
4. Forest Road Trail - 5 miles
5. Spring Path - .25 miles
6. Little Purgatory - .25 miles

*Gates are in place to discourage motor vehicle use. All other trail users are welcome to travel beyond gate.
Rail Trails
Mass Central Rail Trail - Wachusett Greenways Section

Wachusett Greenways is working to open new Rail Trail sections. Following are five existing sections.

Sterling

Location:
1) From Route 12 in Sterling Center, turn Southeast onto Waushacum Avenue. Travel about .10 mile, turn right into the Sterling Cider Mill Complex. Park beyond “Oh My Gosh Antiques & Collectibles”. On the way out, Waushacum Avenue is one way, but turning either right or left on School Street will help you get back to Route 12.
2) At the Intersection of Route 12 and Gates Road in Sterling, head East on Gates Road for .30 mile. A parking lot will be on the right side of the road.

Dogs are only allowed for the first .20 mile, after that they are not allowed.

This section is 1.70 miles long. It takes you through wetlands, woodland and between two picturesque ponds. There are opportunities to see many wildflowers, birds and woodland creatures.

West Boylston

Location: From Route I-190 take exit 5, Route 140 South. Drive about 1.20 miles to the intersection where Route 140 turns left. Instead, bear right onto Thomas Street. Continue approximately .10 mile to the Thomas Street Parking Lot on the right side of the road.

Dogs on leashes are permitted on the trail for about the first 1.50 miles. After passing under Route I-190, the trail becomes part of the Wachusett Reservoir Watershed, and no dogs are allowed.

From the parking area head West along the path. This Rail Trail follows the Quinapoxet River. There are side trails that can be explored as well as remnants of the Springdale Woolen Mill complex. Wild flowers and lots of small animals can be seen along the trail.
Holden

Location: From the intersection of Route 122A and Route 31 in Holden, drive about 1.40 miles North on Route 31. Turn right onto Wachusett Street and then in .10 mile turn left onto River Road. Continue on River Rd. for about .90 mile. The Rail Trail parking area will be on the left.

No dogs allowed.

From this River Street parking area, you will find a hairpin turn. If you head East, you can access the same 3 mile section as you would from West Boylston. If you head West, you will continue to follow the Quinapoxet River, but the trail is narrower, hillier and has tighter turns, than the standard Rail Trail path. Either direction has a nice assortment of flora and fauna.

Rutland

Location: From Routes 56 North and 122A, head North on Route 56 for .30 mile. Turn left onto Miles Road and continue for .30 mile. Parking will be on the left.

Dogs on leashes are allowed.

Thayer Pond. Head West on the Rail Trail and walk along Thayer Pond. This is an incredibly beautiful walk along the pond, some wetlands and the Charnock Cut. Wachusett Greenways is building a Welcome Center here that should be open in the Fall of 2017.

Location: From the intersection of Routes 122 and 122A in Rutland, travel Northwest for .90 miles. The large parking area will be on the right. There is a sign for the Rail Trail along with a small sign for the Midstate Trail which crosses Route 122 and the Rail Trail here.

Dogs on leashes are allowed.

This is a nice tree-lined trail that gives you excellent views of ponds and wetlands. From this parking area you can walk in either direction. There are many side trails that take you into the woods and along side ponds.

Maps
Wachusett Greenways has recently updated their maps. There is an overview and eight enlarged sections. Refer to the following overview map for additional options. For the eight enlarged sections see:

www.wachusettgreenways.org/wordpress/maps-and-trail-sites/mCRT-map/
Mass Central Rail Trail

Rail Trail Route

Map by Zil Phelps Kern

1.7 miles - Sterling Center to Gates Road, Sterling
Park at the old Sterling Cider Mill beyond
Oh My God antique, from Route 12 in Sterling center. Take Gates Road to Route 12, across Route 12 to Bear Road, with extremely cautious, travel south along Bear road to the Sterling West Boylston town line. Cross a railroad track, then immediately turn right through a yellow DCR gate. Take this rough grade, inelastic road one mile to pass through the next yellow DCR gate. Turn right onto Route 110. Use extreme caution on this causeway, where the sidewalk is missing along one bridge. Where Route 110 turns right, turn left and cross a short distance to the outside trailhead on the right.

2.2 miles - Connector from River Street to M-Street
Park at River Street, just west of where River Street bridges the Quinsipat at Harris Street. Across the rail trail, the parking lot is behind the yellow gate. The 2.2-mile connector is not part of the original trail.

3 miles - Route 31 at Mill Street to Princeton Street
Park at Route 31 at Mill Street (north of Holden center). The trail is on road along Mill Street for one mile to the old mill site and waterfalls on the right. Lifting crossing is possible just before the bridge. Turn right through a yellow DCR gate and continue up a steep hill to return to the rail trail. The trail from here to Princeton Street is not yet developed and travels along the rail trail road and old logging roads. Continuing from Princeton Street near Maple Street Park in front of Holden's River/Rutland River town line. Off Route 48, the trail is not yet developed. Travel on roads of your choice to reach the town line at Route 48 where you can pass through a gate on the left and climb back to the railroad bed or continue on to Route 68 and Wachusett Camp.

1.2 miles - Wachusett Street off Route 68
Rutland to Holden line
Park at Wachusett Street just west of Route 68. Travel south 1.2 miles to the Holden line or a bit further. This section of trail is complete and open to the public.

1.6 miles - Route 31 at Mill Street to Princeton Street
Park at Route 31 at Mill Street (north of Holden center). The trail is on road along Mill Street for one mile to the old mill site and waterfalls on the right. Lifting crossing is possible just before the bridge. Turn right through a yellow DCR gate and continue up a steep hill to return to the rail trail. The trail from here to Princeton Street is not yet developed and travels along the rail trail road and old logging roads. Continuing from Princeton Street near Maple Street Park in front of Holden's River/Rutland River town line. Off Route 48, the trail is not yet developed. Travel on roads of your choice to reach the town line at Route 48 where you can pass through a gate on the left and climb back to the railroad bed or continue on to Route 68 and Wachusett Camp.

2.3 miles - Route 122, just west of old Turnpike Road, Park at Mill Road entrance. Travel west over Thayer Pond, through the long, beautiful Charnock cut, then through the Curtiss Tunnels. Continue west across Barrack Trail Road, cross the paved rail trail route Park entrance road, the Wachusett Trail intersection and travel over the middle of the Pomfret River. The exit was completed in 2013 to the final 2014. Updated 3/11

3.3 miles - Route 122, just west of old Turnpike Road, Park at Mill Road entrance. Travel west over Thayer Pond, through the long, beautiful Charnock cut, then through the Curtiss Tunnels. Continue west across Barrack Trail Road, cross the paved rail trail route Park entrance road, the Wachusett Trail intersection and travel over the middle of the Pomfret River. The exit was completed in 2013 to the final 2014. Updated 3/11

Rocky Pond Community Forest
Boylston
New England Forestry Foundation

Location: Rocky Pond Rd.: From I-290 East, take Exit 24, Church Street Turn left, on Church Street/Central Street and drive 1.30 miles. Turn right onto Rocky Pond Road. Drive .10 mile, turn right, continuing on Rocky Pond Road for about .20 mile.

1) Park on the right side of the road for a pond view, and access to a dead end/former logging road.

2) Continue on Rocky Pond Road for an additional .50 mile. There is a sign at the trailhead and an area to park on the left side of the road.

Green St.: From the corner of Central Street and Rocky Pond Road drive .10 mile and continue straight onto Warren Street. Drive .70 mile and bear right onto Green Street. Continue for .80 mile, passing Mile Hill Road.

3) At the sign, park on the right side of Green Street

Length: The trails and roads can be combined for several miles of hiking.

Dogs on leashes are allowed.

This is a sustainably managed forest. The New England Forestry Foundation manages this forest to create income while conserving it for wildlife and the community. The property has old logging paths and a hiking trail that take you through this beautiful diverse forest. The trails are lined with ferns and various wildflowers. There are tall trees as well as an understory of Witch Hazel and young trees. There are many glacial boulders throughout the property.

The 1.20 mile hiking path that crosses the property, has entrances on Rocky Pond Road and Green Street. At the midpoint of the path is an open area on Rocky Pond where you get an excellent view of the pond and some huge glacial boulders. This area can be accessed from all three parking areas. The easiest walk is from parking area (1) (see above) and the dead end/former logging road. You pass private homes, then enter the woods.

The other two sections of the trail have some challenges. Both have areas of moss covered rocks that need to be navigated. Using a hiking pole or walking stick may be helpful. One rocky portion South of the open area is poorly marked. Look for orange flagging tape, as you pick your way through the rocks. Another observation: after periods of wet weather, several spots on the path may have standing water on them. Also, in mid-summer, if the path has not been recently cleared, there will be many thorny fruit bushes arching into the path. It’s a good idea to bring a pair of clippers with you.

Distances
0.60 mile Rocky Pond Rd. to open area on pond.
1.20 miles Rocky Pond Rd. to Green St.
Sibley Farm
Spencer
Common Ground Land Trust
The Greater Worcester Land Trust
Mass Audubon

Location: From the intersection of Route 9 and Greenville Street in Spencer drive for 1 mile Southeast on Greenville Street. There is a parking area on the left that is a starting point for both Sibley Farm and Mass Audubon’s Burncoat Pond Sanctuary.

Length: The Sibley Farm and Burncoat Pond trail system combine for 8 miles of trails.

Dogs on leashes are allowed on the Sibley Farm portion of the property. Dogs are not allowed on Mass Audubon’s Burncoat Pond Sanctuary.

In 2012, this 352-acre property was saved from development and protected by the hard work of many conservation organizations, the Town of Spencer, and the Commonwealth of Massachusetts. There are fields, meadows, forests, ponds, and wetlands to be explored. Volunteers worked hard to restore the property after years of neglect. A trail system has been developed that can be used for hiking, horseback riding, and snowmobiling. The Midstate Trail also crosses the property as it makes its way across the state.

This is a special place that attracts birds and wildlife. A flock of Eastern Bluebirds was spotted in the meadow near the parking area. There are beavers in the wetlands and porcupine, fox, and deer in the woods. The meadows are alive with Queen Anne’s Lace, goldenrods and thistles. Painted Trillium grows along one path and White Baneberry grows along another.

The Greater Worcester Land Trust has erected a tent platform. Camping is offered by permission. For information please check the GWLT website; Camping on GWLT Lands.

This is a multi-use property and hunting is allowed on the Sibley Farm portion of the property. During hunting season please wear bright clothes. Hunting is not allowed on Sunday.

- Burncoat Pond Trails
- All trails are marked with blue and yellow disks.
  - Blue leads you away from the parking area.
  - Yellow indicates you are returning to the parking area.

Lighter areas on both properties are fields.
Slater Woods and Hiland Park
Dudley, Oxford
Dudley Conservation Land Trust
Mass Audubon Society
Mass Wildlife

Location: From Worcester drive South on I-290 to I-395. Follow I-395 South to exit 4B to Oxford Center. At the traffic light in Oxford center continue straight onto Charlton Road. Follow Charlton Road for .70 mile and take a left on Dudley Road (not Old Dudley Road). Go approximately 2.30 miles and park near the sign on the left side of the road.

Distance: About 4 miles

No dogs allowed.

This trail takes you on an adventure that starts on Mass Audubon property on a cart path and a discontinued town road, the Olde County Road. A more rugged path continues through Slater Woods and Hiland Park and takes you by a wetland, along the top of a wooded ridge, and up and down impressive outcroppings. The path ends at the beautiful Peter Pond.

The roundtrip is about four miles, so plan your time accordingly. The paths are well marked. Mass Audubon uses circular blazes and the Slater Woods and Hiland Park use diamond shaped trail markers, but the color scheme is the same. Blue indicates going South towards Peter Pond and Yellow markers are returning to the trailhead on Dudley Oxford Road. There are other woods roads that would take you onto private property, so if you don’t see any trail markers, you may have accidentally taken a wrong turn.

Mass Audubon does not allow hunting, but the other properties do, so wear bright colorful clothing during hunting season. No hunting is permitted on Sunday.
Trail Markings
This well marked trail is about 4 miles roundtrip to Peter Pond and back.

- Blue blazes head away from the parking area.
- Yellow blazes return to the parking area.

Southwick Pond & Muir Meadow  
Paxton/Leicester Line  
The Greater Worcester Land Trust

Location:  
Southwick Pond can be accessed from Route 122 in Paxton. Take Walbridge Road (across from Pleasant View Nursery) to the end (.40 mile). Parking is on the right.  
Muir Meadow is located on Pleasant Street in Paxton. Park on the side of Indian Hill Road or at Howe’s Nursery. If you park at Howe’s Nursery, please ask permission.  
There is an anticipated new parking area for Asnebumskit Ridge. It will be on East side of Pleasant Street just South of Pleasant View Nursery. It will be a .15 mile walk South on Pleasant Street to reach the gate at Muir Meadow.

Length:  
About 2 miles roundtrip, or more depending on the route you pick

Dogs on leashes are allowed.

These two abutting properties are beautiful any season of the year. Both properties have moderately easy trails that take you through many habitats.

Southwick Pond: This is a special place. The trail takes you through a diverse woodland. There are log bridges that take you over a wetland that features Jack-in-the-pulpits, Cinnamon Ferns and frogs. These paths are also a good place to find Red Efts the day after it rains. The trail is in the shape of a lasso. When you reach the beginning of the loop, where the trail divides, continue straight to walk along the pond first. The views of the pond are spectacular. In mid-June, the Mountain Laurel is beautifully showcased against the water. Go to the water’s edge at the beaver dam. The pond has cattails and White Water-lilies. As you complete the loop, look for the main trail, turn right and head in a Northeasterly direction, to return to the parking area.

Muir Meadow: There is a path that starts on Pleasant Street, just North of Howe’s Nursery. Step over the guard rail to begin your hike. The trail has light blue triangular blazes. This path takes you through woods which have some unusual plants like Blue Cohosh and Beaked Hazelnuts as well as Mountain Laurel and blueberries. The path continues along the meadow. Larger Blue Irises, Black-eyed Susan, many species of goldenrod, asters and milkweed make a series of colorful displays. This trail eventually crosses a stone wall and connects up with the loop section of Southwick Pond trail. You can do the Southwick Pond loop or retrace your steps to complete the hike.

Another starting point is at the Muir Meadow sign and gate, across the street from Indian Hill Road. After the gate, check out the “farm pond” on the right hand side. The footing may be a little wet, but there are often surprises like seeing a Great Blue Heron. To cross the meadow you have a choice of turning left (East) and walking along the edge of the meadow or walking straight (South) on the route used by Worcester Water Department maintenance vehicles.
Spencer State Forest
Howe State Park
Spencer
Commonwealth of Massachusetts

Location: From the intersection of Routes 9 and 31 in Spencer, head South on Route 31 for 1.10 miles. Turn right onto Howe Road and drive for 1 mile. The road bears right; you will find parking areas for the Park on both sides of the road.

Length: Many miles through the 965-acre property

Dogs on leashes are allowed.

This is the birthplace of three Spencer inventors; Elias Howe, Jr., the inventor of the sewing-machine, and his uncles, William Howe, inventor of the “Howe truss” bridge, and Tyler Howe, inventor of the spring bed. There is a stone memorial near their former house’s foundation.

This property offers many recreational opportunities including swimming, fishing and picnicking. There are rest rooms which are open during the warmer months. Most of the paths were established for multiple uses including hiking and horseback riding, and in the winter, snowmobiling and cross-country skiing. These paths are wide and easy to walk on. There are also a few hiking paths that are narrower and cover more rugged terrain.

In the picnic area, Howe Pond and Cranberry River have beautiful stone work along their banks. This area attracts many species of birds like Great Blue Herons, and an assortment of ducks. Every season brings a procession of colorful wildflowers like Marsh-marigolds in the Spring; Pickerelweed, Jewelweed and Joe-Pye weed in the Summer; and asters and goldenrod in the Fall.

Spencer State Forest is a multi-use property. During hunting season, wear bright colorful clothing. No hunting is permitted on Sunday.
Summer Star Wildlife Sanctuary®
690 Linden Street
Boylston, MA

Location: From I-290 East, take Exit 24, Church Street. Turn left, on Church Street/Central Street and drive 1.30 miles. Turn Right onto Rocky Pond Road. Drive .10 mile and continue straight onto Warren Street. Drive .70 mile and bear right onto Green Street. Continue for .50 mile. Turn left onto Mile Hill Road and drive for .40 mile. Turn right onto Linden Street. Drive for .80 mile, Summer Star will be on the right.

Length: 1.75 miles

No dogs allowed.

Hours: The trails are open from dawn to dusk, Saturday through Tuesday.
Summer Hours: The Trailhead House is open 11:00 am to 3:00 pm on these days. Sunday 11:00 am to 5:00 pm

Summer Star Wildlife Sanctuary® is the inspiration of one person. It is a place “where wildlife lives freely, and where people can appreciate and celebrate nature. The Sanctuary is a place of tranquility and self-reflection.”

This 45 acre property is located in the heart of a conservation effort in Boylston, Berlin and Northborough. The Tri-town Landscape Partnership Project is trying to protect hundreds of acres of roadless land to link critical wildlife habitats and maintain wildlife corridors.

Summer Star’s trails take you through a rich wooded landscape that features many glacial boulders. There are beautiful stone walls and evidence of past quarrying. There is a path to Wrack Meadow Brook, a beautiful babbling stream. On the other side of the brook is another protected property, the Sudbury Valley Trustees’ Wrack Meadow Reservation.

An exciting addition to the Sanctuary is a beaver dam that brings another habitat to the property. The down side is that it has flooded part of the trail on the Eastern side. In the Spring, the path may be impassable, or at least hard to get around. Plans are being formulated to put boardwalks through the area.

The Trailhead House is environmentally designed, from the composting toilets to the rooftop Earth garden that complements the surrounding landscape. The Trailhead House is a work of art which has been built from sustainable materials. It houses several art shows every year. The building lets you be part of and one with nature.
Summer Star Wildlife Sanctuary®
690 Linden Road, Boylston, MA

The trails are open from dawn to dusk, Saturday - Tuesday. Summer Hours: Trailhead House is open on the same days: 11:00 am - 3:00 pm Sunday: 11:00 am - 5:00 pm
Trout Brook
Holden
Town of Holden

Location: There are four parking areas. The following directions start from the intersection of Routes 122A and 31 in Holden.

1) Manning Street - Drive North on Route 31 for 2 miles. Turn right onto Manning Street. Drive East for .90 mile. The parking lot is on the left. All of the trails can be accessed from here.

2) North Street - Follow the directions for Manning Street. Continue .20 mile further and turn left onto North Street. Continue for about .70 mile. The parking area will be on the left side of the road. The Bob Elms (Blue) Trail and the White Oak Trail can be accessed from here. See the next section for the description for the White Oak Trail.

3) Mason Road - Drive North on Route 31 for 3.10 miles. Turn right onto Mason Road. Continue for .90 mile. The parking lot is on the right side. The Red, White, and Blue Trails can be accessed from here.

4) Sterling Road - Follow the directions for Mason Road. Pass the Mason Road parking area and turn right onto Sterling Road. Drive about .10 mile. The parking area will be on the right. Access the Bob Elms (Blue) Trail from here.

Length: There are many paths that can be combined for 8-10 miles of hiking.

Dogs on leashes are allowed.

Multi-use property. Wear bright colorful clothing during hunting season. No hunting is permitted on Sunday.

This is a huge property with many varied hiking opportunities. From the parking area of the main entrance on Manning Street, walk North passing by a large picnic area that includes many picnic tables. To start hiking, walk around the left side of the small pond. The Red and White Trails begin on the other side of the pond. This point is about .40 mile from the parking area, so keep that in mind when estimating the length of the walk you want to take. The Red and White trails can be combined for a nice loop. The Red Trail goes through the woods while the White Trail walks along Trout Brook and crosses wetlands.

The Short Loop/Mushroom Trail starts from a point midway around the pond. Walk through a picnic structure and cross a bridge. This short steep trail climbs up through the forest and then takes you down to the old mill dam. This gives you a great look at Trout Brook. Follow the brook East and cross a bridge that takes you to the beginning of the Red and White Trails. To continue a short combined trail hike, walk .50 mile North on the Red/White Trails and turn West onto the Bob Elms Trail (Blue) for several tenths of a mile. Turn South onto the Christmas Tree Trail which takes you through a field. At this time the turn for the Christmas Tree Trail is not marked, but it is a noticeable intersection. This trail reconnects with the Red/White Trails. Walk South around the pond and back to the parking area.

The Bob Elms Trail (Blue) is named in honor of Bob Elms, who worked on the trails of Trout Brook, and the White Oak Trail, and helped maintain the Midstate Trail. This is a very wet trail, especially at the northern end. In wet weather, there may be some large areas of shallow water that have to be carefully crossed. This also is an incredibly beautiful area. Downed trees are covered in moss, and everywhere you look is a terrarium-like scene of woodland ground covers.
Trails over DFW land are not marked or maintained.
Tufts Branch Valley Wildlife Sanctuary
Keekamoochaug Wildlife Sanctuary
Dudley
Dudley Conservation Land Trust

Location: Healy Road: .20 mile East of the intersection of Route 31 (Dresser Hill Road) and Healy Road. There is a small parking lot on the Northern side of the road by the kiosk.

Length: .625 mile roundtrip to the knoll, several miles with an extended hike

Dogs on leashes are allowed.

This is a pair of adjacent, unique properties. Both have beautiful stone walls at their entrances. The path from the parking area at Tufts Branch Valley Wildlife Sanctuary passes many wet areas that are covered with a boardwalk. In the Spring, Spotted Crane’s-bill, Jack-in-the-pulpit and Cinnamon Ferns grow along the boardwalk, and later in the Summer, Jewelweed, Virgin’s-bower, and asters are in bloom. Near the top of the Boardwalk Trail you have a choice of going directly to the top or taking Sofie’s Way, an easier path with switchbacks. As you reach the knoll, a grassy vista opens before you. This extensive open area is well maintained and offers incredible views East of Dudley Hill and South to Connecticut. Benches allow you to relax and enjoy this spot. In the late Summer there is a large area of goldenrod and milkweed. In Fall, there are many birds eating the berries that grow along the trails.

From the knoll, there are paths that take you into the woods where you follow a tributary of the Tufts Branch and enjoy a winding path through the forest. There are benches placed at prime spots along the path.

This area is a magnet for wildlife; deer, raccoons, rabbits, chipmunks, possum, skunk, fishers, coyotes and bobcats have all been spotted.

There is a .20 mile moderately difficult trail that you can take from the Keekamoochaug Wildlife Sanctuary property sign to join the Boardwalk Trail. This sanctuary has several intermittent streams and beautiful wildflowers. There is a dedication plaque to this park’s benefactors on a boulder near the trail. It is an easy walk on Healy Road to get from one property entrance to the other.
Weiloch Woods
Dudley
Dudley Conservation Land Trust

Location: Route 197 (West Main Street) .25 mile East of Center Street. The entry is just after the 3rd house (380 West Main Street). This is a fast road, so be careful entering and exiting the access road.

Length: 2 - 3 miles

No dogs allowed.

This a beautiful 86.66 acre woodland. The parking area is near a partially removed dam. There is a woods road that takes you along the newly created wetland, through pine groves and Northwest to a section of the Grand Trunk rail bed. There is an observation deck overlooking the wetlands for birdwatching, where Great Blue Herons, Eastern Kingbirds, Pine Warblers, and Red-tailed Hawks have been spotted. One path takes you to the top of a hill where there is a nice view of the area when the leaves are off of the trees. The trail system is being developed and a kiosk erected. The work should be completed in 2017.
White Oak Trail
North Street, Holden
White Oak Land Conservation Society

Location: From the intersection of Routes 122A and 31 in Holden, drive North on Route 31 for 2 miles. Turn right onto Manning Street. Drive East for 1.10 miles and turn left onto North Street. Continue for about .70 mile. The parking area will be on the left side of the road.

Length: Several miles

Dogs on leashes are allowed.

The White Oak Trail was built under the auspices of Wachusett Greenways and is dedicated to Rolf Larson, a leader in making the trail. This trail is well established and easy to hike on. In the Spring there are Trailing-arbutus, Wintergreen, Indian Cucumber-root and Pink Lady’s-slippers along the trail. In fall, asters bloom and there are mushrooms in every color of the rainbow. The White Oak Trail has the natural beauty of the trails in Trout Brook, along with several notable landmarks. The White Oak Land Conservation Society’s name was inspired by a majestic White Oak tree. This tree fell during the winter of 2014. The remains of this landmark can be found at the Southwestern corner of the trail. There is also an old town boundary marker on the Holden/West Boylston line. The chiseled town initials are still visible on the marker. There are also many large glacial boulders. One found at the Northeastern portion of the trail is affectionately called Dinosaur Rock.

One different treat is seeing the horses at Belle Wood Stables as you walk back to the parking area on North Street.

The White Oak trail passes through properties that are owned by various organizations. The parts of the trail owned by the DFW (Department of Fish and Game) are not marked or maintained.

Multi-use property. Wear bright colorful clothing during hunting season. No hunting is permitted on Sunday.
Trails over DFW land are not marked or maintained.

During hunting season, bright colors are recommended for people and pets.
